What is Cryptocurrency ?

Although there are many types of cryptocurrencies, they all have one thing in common: they operate on blockchain technology, making them decentralized.

Selecting A Cryptocurrency

Decentralized finance (DeFi) cryptocurrencies are some of the hottest altcoins of 2021. Altcoins are a general term for any cryptocurrency other than Bitcoin. DeFi tokens are typically built on Ethereum's blockchain and replace traditional banking functions with code. Popular DeFi tokens like yearn.finance, Compound and Uniswap are up over 500% in the past 6 months.
